

# LMS 14-Day Marketing Plan

A practical day-by-day launch plan to attract students, parents, and course buyers without using paid APIs or complicated tools.

**Main target: get your first qualified leads, demo requests, WhatsApp inquiries, and trial users in the next 14 days. Keep the offer simple, prove trust, and follow up daily.**

|                                                                                             |                                                                                   |
|---------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Best channels<br>WhatsApp, Facebook, Instagram, TikTok/Reels, Google Business, local groups | Daily time<br>2 to 4 focused hours                                                |
| Budget<br>Start organic. Optional ads: small test budget only after Day 7.                  | Offer<br>Free demo, first-week discount, parent progress report, or trial lesson. |

# Before You Start

Keep the first campaign narrow. Do not market the LMS as “for everyone.” Pick one main buyer and one main promise.

| Item         | Decision to write before Day 1                                                                           |
|--------------|----------------------------------------------------------------------------------------------------------|
| Audience     | Students, parents, teachers, institutes, tuition classes, or course creators. Pick one primary audience. |
| Core promise | Example: “Study faster, track progress, and prepare exams in one clean platform.”                        |
| First offer  | Free demo, 7-day access, launch discount, or first batch enrollment offer.                               |
| Contact path | WhatsApp link, phone number, simple form, or demo booking link.                                          |
| Proof        | Screenshots, short demo video, teacher profile, student result, or parent trust message.                 |

## Simple launch message:

“We are launching a modern LMS for students to access lessons, assessments, progress tracking, and study support in one place. We are opening limited early access this week. Message us on WhatsApp for a demo.”

# 14-Day Action Plan

|                |                                                                                                                                                                                                                                                                             |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Day 1</b>   | Positioning + offer<br>Goal: make the LMS easy to understand in 10 seconds                                                                                                                                                                                                  |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Choose one target audience for the first campaign.</li> <li>2. Write one clear offer: demo, trial, launch discount, or first batch access.</li> <li>3. Prepare a WhatsApp reply template and inquiry tracking sheet.</li> </ol>   |
| <b>Output</b>  | One audience, one offer, one contact path.                                                                                                                                                                                                                                  |
| <b>Day 2</b>   | Landing page / public page polish<br>Goal: make visitors trust you before they message                                                                                                                                                                                      |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Update homepage or landing section with screenshots and benefits.</li> <li>2. Add clear CTA buttons: Book Demo, WhatsApp, Start Trial.</li> <li>3. Add FAQ: pricing, access, classes, payments, support.</li> </ol>               |
| <b>Output</b>  | A page you can confidently share.                                                                                                                                                                                                                                           |
| <b>Day 3</b>   | Content pack creation<br>Goal: prepare reusable marketing assets                                                                                                                                                                                                            |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Create 5 screenshots of the LMS: dashboard, assessments, study hub, plans, mobile view.</li> <li>2. Write 10 short captions for social posts.</li> <li>3. Create 3 simple posters: launch, benefits, demo invite.</li> </ol>      |
| <b>Output</b>  | A small content library for the next two weeks.                                                                                                                                                                                                                             |
| <b>Day 4</b>   | WhatsApp launch list<br>Goal: reach warm contacts first                                                                                                                                                                                                                     |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Make a list of friends, students, parents, teachers, and local education contacts.</li> <li>2. Send a personal message, not spam.</li> <li>3. Track replies: interested, demo booked, follow-up later, not interested.</li> </ol> |
| <b>Output</b>  | First warm conversations started.                                                                                                                                                                                                                                           |
| <b>Day 5</b>   | Demo video day<br>Goal: show the product instead of only explaining it                                                                                                                                                                                                      |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Record a 45-90 second screen demo.</li> <li>2. Show login, course page, assessment, payment/plans, and mobile view.</li> <li>3. Post it on WhatsApp status, Facebook, Instagram, and TikTok/Reels.</li> </ol>                     |
| <b>Output</b>  | One short demo video published.                                                                                                                                                                                                                                             |
| <b>Day 6</b>   | Trust building content<br>Goal: make parents/students feel safe                                                                                                                                                                                                             |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Post "why we built this LMS."</li> <li>2. Post admin/teacher introduction.</li> <li>3. Post screenshots of progress tracking and assessments.</li> </ol>                                                                          |
| <b>Output</b>  | Trust-focused posts published.                                                                                                                                                                                                                                              |

|                |                                                                                                                                                                                                                           |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Day 7</b>   | First demo session<br>Goal: turn attention into leads                                                                                                                                                                     |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Run a live or recorded demo for interested people.</li> <li>2. Answer questions about pricing and access.</li> <li>3. Offer limited early access or launch discount.</li> </ol> |
| <b>Output</b>  | Demo completed and leads tagged.                                                                                                                                                                                          |

|                |                                                                                                                                                                                                                                            |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Day 8</b>   | Referral loop<br>Goal: use early users to bring more users                                                                                                                                                                                 |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Create a referral offer: bring one friend, get discount/access bonus.</li> <li>2. Send it to warm leads and first users.</li> <li>3. Ask teachers/admins to share in relevant groups.</li> </ol> |
| <b>Output</b>  | Referral offer launched.                                                                                                                                                                                                                   |
| <b>Day 9</b>   | Small paid test or boosted post<br>Goal: test demand without wasting money                                                                                                                                                                 |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Pick the best-performing post/video.</li> <li>2. Boost only to your target location/audience.</li> <li>3. Use WhatsApp or landing page CTA; monitor cost per message.</li> </ol>                 |
| <b>Output</b>  | Small ad test started or planned.                                                                                                                                                                                                          |
| <b>Day 10</b>  | Objection handling<br>Goal: fix reasons people do not join                                                                                                                                                                                 |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Collect common questions from leads.</li> <li>2. Create posts answering price, access, payment, mobile, and support questions.</li> <li>3. Update FAQ on the website.</li> </ol>                 |
| <b>Output</b>  | Objection posts and FAQ improved.                                                                                                                                                                                                          |
| <b>Day 11</b>  | Follow-up day<br>Goal: recover interested leads                                                                                                                                                                                            |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Message everyone who replied but did not join.</li> <li>2. Use a polite reminder with one benefit and one CTA.</li> <li>3. Offer a demo time or trial access.</li> </ol>                         |
| <b>Output</b>  | Warm leads followed up.                                                                                                                                                                                                                    |
| <b>Day 12</b>  | Partnership outreach<br>Goal: find small distribution partners                                                                                                                                                                             |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Contact tuition centers, teachers, student groups, and education pages.</li> <li>2. Offer demo access or commission/referral benefit.</li> <li>3. Ask for one post/share/demo slot.</li> </ol>   |
| <b>Output</b>  | At least 10 partner messages sent.                                                                                                                                                                                                         |
| <b>Day 13</b>  | Proof + urgency<br>Goal: increase conversions before the sprint ends                                                                                                                                                                       |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Post early response/testimonial/screenshot if available.</li> <li>2. Mention limited launch offer deadline.</li> <li>3. Remind people how to join.</li> </ol>                                    |
| <b>Output</b>  | Conversion-focused post published.                                                                                                                                                                                                         |

|                |                                                                                                                                                                                                                                                                         |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Day 14</b>  | Review + next sprint<br>Goal: double down on what worked                                                                                                                                                                                                                |
| <b>Actions</b> | <ol style="list-style-type: none"> <li>1. Count inquiries, demos, signups, payment interest, and best channel.</li> <li>2. Write what worked, what failed, and next 14-day target.</li> <li>3. Plan the next campaign around the highest-performing channel.</li> </ol> |
| <b>Output</b>  | Marketing report and next sprint plan.                                                                                                                                                                                                                                  |

## Daily Posting Ideas

| Type               | Example                                                                                              |
|--------------------|------------------------------------------------------------------------------------------------------|
| Problem post       | "Students lose notes, deadlines, and exam progress across many apps. Our LMS keeps it in one place." |
| Demo post          | Short video: "How a student starts a quiz and sees progress."                                        |
| Parent trust post  | "Parents can understand progress without asking every day."                                          |
| Teacher/admin post | "Less manual tracking. More visibility into student learning."                                       |
| Offer post         | "Limited early access is open this week. Message us for demo."                                       |
| FAQ post           | "Can students use it on mobile? Yes, it is mobile-friendly."                                         |

## WhatsApp Follow-up Scripts

First message: Hi, we are opening early access for our LMS. It helps students access lessons, assessments, study progress, and updates in one place. Would you like me to send a short demo video?

After demo: Thanks for watching. Would you like trial access or a quick walkthrough? I can help you set up the first student/course today.

Gentle follow-up: Just checking if you had a chance to see the LMS demo. We are keeping early access open this week, so I can still arrange a demo or launch offer for you.

## Numbers to Track Every Day

| Messages sent       | Minimum 20 meaningful messages/day for first 5 days |
|---------------------|-----------------------------------------------------|
| Replies             | Track interested, maybe later, not interested       |
| Demo views          | At least 50-100 views across WhatsApp/social        |
| Demo bookings       | Aim for 5-10 demos                                  |
| Trial users/signups | Aim for first 3-10 users depending on audience      |
| Best channel        | Mark where each lead came from                      |

# 14-Day Execution Checklist

| Done                     | Task                                                              |
|--------------------------|-------------------------------------------------------------------|
| <input type="checkbox"/> | Landing page has clear CTA and WhatsApp/contact link.             |
| <input type="checkbox"/> | At least 5 LMS screenshots are ready.                             |
| <input type="checkbox"/> | One short demo video is recorded.                                 |
| <input type="checkbox"/> | Launch offer is written clearly.                                  |
| <input type="checkbox"/> | Warm contact list is created.                                     |
| <input type="checkbox"/> | Daily social post is published.                                   |
| <input type="checkbox"/> | Every lead is tracked with status and source.                     |
| <input type="checkbox"/> | Every interested lead receives a follow-up within 24 hours.       |
| <input type="checkbox"/> | One demo session is completed.                                    |
| <input type="checkbox"/> | Referral offer is shared.                                         |
| <input type="checkbox"/> | FAQ is updated from real questions.                               |
| <input type="checkbox"/> | At least 10 partnership messages are sent.                        |
| <input type="checkbox"/> | End-of-sprint metrics are reviewed.                               |
| <input type="checkbox"/> | Next 14-day campaign is planned from the best-performing channel. |

## Simple rule for the first 14 days:

Do not try every marketing idea. Share a clear demo, talk to real people, follow up fast, and measure which channel creates actual inquiries. After 14 days, repeat only what worked.
