

# Claude Code Prompt

Medical LMS brand-name generation brief

## Copy this prompt into Claude Code

Use this when you want a stricter naming pass that fits the actual product: a modern ERPM-focused medical study platform, not a generic LMS or old-school tuition brand.

You are helping name a serious medical LMS brand.

### Context:

This product is an LMS/study platform for Sri Lankan medical students preparing for ERPM and related medical exams. It includes structured medical subjects, interactive notes, quizzes, practice mode, exam mode, analytics, weak-area tracking, bookmarks, subscriptions, PWA/mobile/desktop support, and AI-assisted quiz/content generation.

### Brand goal:

Create a strong, modern medical learning brand like Osmosis, Kenhub, Geeky Medics, Amboss, or Sketchy. Do not make it sound like an old-school tuition class, academy, institute, or generic

### Avoid these words and styles:

- LMS
- Academy
- Institute
- School
- Tuition
- Mastery
- Compass
- Mentor
- Prep
- Course
- Learn
- Edu
- Generic names like Learnova, SkillBridge, MedPath, ERPM Mastery

### Naming requirements:

- Must feel medical, clinical, or anatomy-related
- Must be short, memorable, and brandable
- Should work as an app name, website name, YouTube channel name, and community name
- Should feel modern, not childish
- Should be serious but not boring
- Should be easy to pronounce for Sri Lankan students
- Can be inspired by medical words like anatomy, physiology, pathology, clinical practice, hospital culture, diagnosis, recall, exams, wards, rounds, notes, or question stems
- Prefer names that can grow beyond ERPM later, but still allow positioning as an ERPM platform

### Deliver:

1. Generate 80 fresh brand name ideas.

2. Do not repeat these names: ClinIQ, Synapse, Wardnote, Pulse, Scrubbed, Viva, Clinix, Medbyte, Rounds, GreyMatter, Auscult, Medulla, Suture, Murmur, OnRounds, PostCall, CortexIQ, VivaLab, CaseLabs, RecallRx, Acuity, Lumen, Plexus, StemLab, Osler, Afferent, Dura, CoreDx, RecallRoom, CuraCore.

3. Group names by category:

- Anatomy-inspired
- Clinical/hospital culture
- Exam/question-bank inspired
- Premium startup-style medical names
- Bold memorable names

4. For each name, give a one-line reason why it works.

5. Pick the top 10.

6. Pick the best 3 overall.

7. For the best 3, provide:

- Tagline
- Brand personality
- Possible logo direction
- Why Sri Lankan medical students would remember it

8. Be strict. Reject weak, old-fashioned, or generic names.

Think like a brand strategist, not a teacher naming a class.
