

Xyndrome - final test sheet

iOS app, pre-release. Tick P (pass) or F (fail). Write what you actually saw in Notes - "looks wrong" is hard to fix, "the heading said ==X==" is not.

Tester		Date	
Device		iOS version	
App version		Build	
Backend deployed? (git pull + restart)		Signed in as	

If the backend has not been pulled and restarted, section A will fail for that reason alone - check that box first.

A. CHANGED IN THIS RELEASE - test these first

Everything below was written or fixed in the last few days. If anything regressed, it is most likely here.

#	Check	Expected	P	F	Notes
1	Sit a PREMIUM exam in the app and press Submit at the end	Submits and shows the result. NOT 'Could not submit exam ... 403'			
2	While sitting that exam, close and reopen the app mid-paper	Answers given so far are still there (progress was being saved)			
3	Open a course whose lessons have a topic heading (e.g. ATLS)	Heading sits exactly where admin placed it, not pushed to the end			
4	In admin, move a topic group up/down, then reopen that course in the app	Whole group moves together, lessons stay with their heading			
5	Open a lesson containing a classification chart (branch card)	Renders: topic box on top, its sub-types stacked under it. Not blank			
6	Open a lesson whose Management card has a drug mechanism	Mechanism shows as arrow steps under a labelled rule inside that card			
7	Open a lesson with a highlighted table column heading	Heading reads as plain text. NOT literal '==X=='			
8	Open an OSCE short case that has treatment written	A 'Treatment' stop appears between Investigations and Summary			
9	Open an OSCE long case that has treatment written	Treatment block appears after 'Initial management', both visible			
10	Open an OSCE case with NO treatment written	No Treatment step and no empty section			
11	Open Planner while NOT subscribed	'Generate study plan' card shows a PRO badge			
12	Tap Generate study plan while NOT subscribed	Paywall opens. Cancelling returns to Planner, nothing created			
13	Tap Generate study plan while subscribed	Goes straight to the form, no paywall			
14	Add a task by hand while NOT subscribed	Works, no paywall - manual tasks stay free			
15	Generate a plan over 2-3 courses and watch the loading screen	Ring keeps moving and counts 'N of M tasks'. No green tick until done			
16	Count tasks created vs tasks promised	All of them land. No partial plan			
17	Generate a plan with the phone in airplane mode	Clear error. No half-created plan left in the Planner			
18	Delete your account / sign in as a brand-new user	Welcome screen asks for nickname + avatar before the dashboard			

B. Sign in, sign up and onboarding

#	Check	Expected	P	F	Notes
1	Sign in with email + password	Lands on dashboard, stays signed in after force-quit			
2	Sign in with Google	Completes without leaving the app to a broken page			
3	Sign in with Apple	Completes; name/email handled even if hidden			
4	Sign up with a new email	6-digit OTP arrives by email, code is NOT shown on screen			
5	Enter a wrong OTP	Clear error, can resend			
6	Sign out, then reopen the app	Returns to sign-in, not a blank screen			
7	Onboarding: skip / leave the name blank	Handled gracefully, no dead end			
8	Force-quit during onboarding, reopen	Onboarding resumes, not skipped silently			

C. Shell, navigation and theme

#	Check	Expected	P	F	Notes
1	Move through every bottom-nav tab	No flicker, no blank frame, tab bar stays readable			
2	Check the bottom nav over a scrolling list	Blur/gradient looks right, content readable behind it			
3	Open any popup/sheet (profile, filters, reminders)	Sheet paints ABOVE the tab bar, not under it			
4	Rotate / use a larger device	No overlap, nothing clipped at the edges			
5	Switch light <-> dark in Profile > Appearance	Every screen follows, no white flash, no unreadable text			
6	Check safe areas with the dynamic island	Headers and timers clear of the island			

D. Courses, lessons and the notes canvas

#	Check	Expected	P	F	Notes
1	Open Study > Lessons, pick a course	Subjects listed, lesson counts correct			
2	Open a lesson with notes	Canvas opens, cards readable, no yellow debug underlines			
3	Pinch/zoom and scroll the canvas	Smooth, stays inside bounds			
4	Write with Apple Pencil / finger on the canvas	Ink appears where expected, no lag spikes			
5	Switch pen / highlighter / eraser and sizes	Each tool behaves; highlighter is translucent			
6	Close and reopen the lesson	Your ink is still there			
7	Open a PDF lesson	PDF renders, annotation works, saved on reopen			
8	Open a locked (premium) lesson	Lock shown with a clear reason, no crash			
9	Flow card (cause -> effect)	Centered down-arrows, no cards/labels around steps			
10	Image / image-explained card	Image loads at sensible size with its caption			

E. Q-Bank, quizzes and exams

#	Check	Expected	P	F	Notes
1	Open Q-Bank, pick a subject	Topic name above, quizzes listed under it			
2	Start a PRACTICE quiz	Questions load, answer feedback immediate			
3	Start an EXAM	Timer counts down, question count correct			

#	Check	Expected	P	F	Notes
4	Answer a true/false (multi-statement) question	Each statement records separately			
5	Let an exam timer run out	Auto-submits, result shown, no lost attempt			
6	Review a finished attempt	Correct answers + explanations, images load			
7	Open a quiz outside your subscription scope	Clear message, not a raw error			

F. Flashcards

#	Check	Expected	P	F	Notes
1	Open Flashcards for a lesson	Deck loads, card flips			
2	Grade cards Again / Hard / Good / Easy	Next due interval changes sensibly			
3	Leave and come back later	Due counts persist, not reset			
4	Flashcard with an image	Image renders (not a broken box)			
5	Create a personal flashcard / deck	Saves and appears in your own list			

G. OSCE clinical

#	Check	Expected	P	F	Notes
1	Open OSCE, pick a category	Cases listed with difficulty			
2	Walk a short case end to end	Exam > Mechanism > Ix > Treatment > Summary > OSCE			
3	Tap findings on the body map	Opens the right finding with its image			
4	Play an auscultation sound inside a case	Plays, markers line up, stops on leaving			
5	Tick the practice checklist, leave, return	Ticks persist			
6	Walk a long case end to end	History sections flow, differentials and viva present			
7	Open a case with missing media	Placeholder, not a crash or endless spinner			

H. ECG, auscultation, drugs, saved and notifications

#	Check	Expected	P	F	Notes
1	ECG hub: open each of the 4 cards	Basics / Rhythm library / Practice cases / Quiz all load			
2	ECG: a heading starting with 'Basics'	Filed under the Basics category			
3	Auscultation: heart and lung	Icons correct, centred, sounds play			
4	Drugs randomiser: spin	Returns a drug with its details, repeatable			
5	Saved pages / bookmarks	Saving and unsaving reflects immediately and after reopen			
6	Personal notes	Create, edit, delete all persist			
7	Notifications: open the list	Items listed, tapping opens the right screen			
8	Notifications: clear one / clear all	Stays cleared after reopening the app			
9	Push notification while app is closed	Arrives and opens the right screen			

I. Planner

#	Check	Expected	P	F	Notes
1	Open Planner with no tasks	Empty state explains what to do			
2	Add a task by hand with a due date	Appears under that day			

#	Check	Expected	P	F	Notes
3	Tick a task done	Moves to done, count updates, survives reopen			
4	Delete a task	Removed, stays removed after reopen			
5	Generate a plan 'by day'	Tasks spread across days within your hours/day			
6	Generate a plan 'by subject'	Tasks grouped by course, no due dates			
7	Set a reminder time	Notification arrives at that time			
8	Reset the planner	Clears all, with confirmation first			

J. Subscriptions and in-app purchase

#	Check	Expected	P	F	Notes
1	Open Subscriptions while not subscribed	Plans listed with correct prices			
2	Open the paywall	Renewal terms shown (Apple requires it)			
3	Buy a plan with a sandbox account	Unlocks immediately, no restart needed			
4	Restore purchases	Restores without buying again			
5	Cancel mid-purchase	Returns cleanly, nothing charged or unlocked			
6	Check locked content after subscribing	Previously locked lessons/quizzes now open			
7	Check content outside your plan's courses	Still locked, with a clear reason			

K. Network, lifecycle and device

#	Check	Expected	P	F	Notes
1	Airplane mode on every main tab	Clear offline message, no infinite spinner			
2	Drop to a slow connection mid-load	Recovers or errors clearly, never hangs silently			
3	Force-quit and reopen on each main screen	Returns to a sane state, still signed in			
4	Leave the app backgrounded for an hour	Still signed in, data refreshes on return			
5	Low battery / low power mode	Animations degrade gracefully			
6	Largest accessibility text size	Nothing clipped or overlapping badly			
7	Run on iPad	Layout usable; note anything stretched - phone-width by design			

Blockers found		Cleared to ship?
